

Pasta Maker Machine

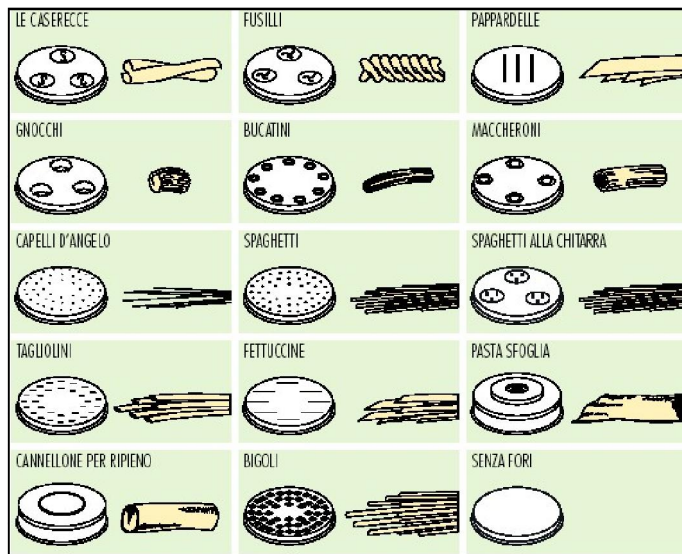

Model MPF 1.5—MPF 4

The Fimar Pasta Machine does everything by itself. You place the ingredients inside the stainless steel hopper and after a few minutes you will have ready the desired pasta in different shapes and sizes.

The machine guarantees the best hygiene conditions as the parts, which are in contact with the dough, can be easily removed for cleaning. Built in metal with movements on ball bearings and permanently greasing, requiring practically no maintenance. All models are designed according to national and international norms for accident prevention.

Model MPF 4 comes with an electronic pasta cutter.

Optional on request:
